blhanson@ucsd.edu

EDUCATION

University of California San Diego - La Jolla, CA

Major: Aerospace Engineering

Field: Dynamic Systems and Controls

Current Ph.D., Expected May 2027

University of California San Diego - La Jolla, CA

Major: Aerospace Engineering

Field: Dynamic Systems and Controls

M.S., June 2024

GPA: 3.744

Colorado School of Mines - Golden, CO

Major: Engineering Physics

Minor: Robotics and Intelligent Systems

Area of Special Interest: Space and Planetary Sciences Engineering

B.S., May 2022

Summa Cum Laude, GPA: 3.93

RELEVANT EXPERIENCE

NSTGRO Visiting Technologist Experience - Jet Propulsion Laboratory

June 2024/25 - August 2024/25

- Two, 10-week summer internships in Section 392K/324G: Mission Design and Navigation System Engineering
- Summer 2025:** Discovered a strong relationship between the validity time of the Gaussian assumption and the unscented transform's skewness for low fidelity astrodynamics systems, which can be used for efficient-yet-accurate hybrid estimation
- Summer 2024:** Applied non-Gaussian ensemble and grid-based techniques to the state uncertainty propagation of distant prograde orbits in the Saturn-Enceladus system as a proof of concept for outer planetary orbilander estimation and navigation; facilitated efficient communication between JPL's Monte library and C source code via Python wrapper

Air Force Office of Scientific Research (AFOSR) Summer Faculty Fellowship Program

July 2023 - September 2023

- Performed research at the Air Force Maui Optical and Supercomputing (AMOS) site hosted by the 15th Space Surveillance Squadron
- Developed a thorough validation of the landscape of numerical integrators and their respective accuracies relating to the state propagation of cislunar satellites in near-rectilinear halo orbits (NRHOs)
- Used publicly available ephemerides of CAPSTONE to detect orbital-maintenance maneuvers (OMMs) for numerical integration accuracy analysis, specifically comparing REBOUND, ASSIST, and GMAT

Auger@TA Ultra High Energy Cosmic Ray Detector Simulation Analysis

August 2021 - May 2022

- Collaboration between the Pierre Auger Observatory in Argentina and the Telescope Array in Utah to calibrate energy detection method variations
- Collected data using Linux Offline simulations with a varying number of photomultiplier tubes to determine if results were similar
- Visualized simulation data on the reliability of a single PMT detector vs. a triple PMT detector via Python
- Principal Investigator: Dr. Frederic Sarazin, Colorado School of Mines Physics Department

National Science Foundation REU - University of Florida, Astronomy Department

May 2021 - August 2021

- Developed and gave presentation on decomposing galactic spectral energy distributions and inferring properties from the simple stellar populations that make up the galaxies
- Utilized Bayesian statistics programming, specifically Markov Chain Monte Carlo to find spectrum best fit for age/metallicity
- Used HiPerGator, UF supercomputer, along with other Python simulation tools and techniques to model galactic behavior
- Principal Investigator: Dr. Paul Torrey, University of Florida Astronomy Department

UC San Diego MAE143B Linear Control Teaching Assistant

August 2025 - September 2025

- Duties included holding office hours, developing solutions sets to homeworks and exams, grading homework and exams, and presenting in lecture

HONORS AND AWARDS

- 2026 ASME Graduate Student Video Competition, 1st Place**, "[Predicting a Potential Lunar Impact: A Hybrid, Measurement-free Approach to Tracking Asteroid YR4](#)" (March 2026)
- Student Travel Award for the 2026 SIAM Conference on Uncertainty Quantification**, "A Parallel Grid-based Algorithm for Orbital Uncertainty Propagation" (March 2026)
- NASA Space Technology Graduate Research Opportunities (NSTGRO) Fellow** (Grant # 80NSSC23K1219), "A Grid-Based Bayesian Approach to Uncertainty Propagation for Icy-Moon Missions" proposal (August 2023 - August 2027)
- Chambliss Astronomy Achievement Student Award Honorable Mention**, 240th AAS Meeting Presentation on "A Flexible Approach to Fitting Galactic Spectral Energy Distributions" (June 2022)
- Colorado School of Mines Undergraduate Research Fellow (MURF)**, "Assembly of Microparticles for Robots and Composite Materials Under Combined Electric and Magnetic Fields" (August 2020 - May 2022)

- **Colorado School of Mines Physics Undergraduate Research Symposium: Best Individual Technical Research Project**, “Optimizing the Selection of Reconstructed Events in Auger@TA for Cross-Calibration Purpose Through Simulations” (April 2022)
- **Colorado School of Mines Dean’s List** (August 2018 - May 2022)
